Education

Sri Vekateswara University

Bachelor of Technology in Electrical and Electronics

Sep. 2020 – May 2024

Tirupati, Andhra Pradesh

Summary

Software Developer (1+ yrs) skilled in Java, Spring Boot, React.js, and AWS. Built IoT systems handling 1,000+ devices in production, reduced latency and downtime significantly and passionate about delivering production-ready solutions that improve reliability and reduce downtime.

Technical Skills

Languages: Java, SQL, HTML/CSS, JavaScript, React, Js, Python

Developer Tools: Maven, Docker, Kubernetes, Git, Apache Kafka

Technologies/Frameworks: Spring Framework, Spring Boot, Hibernate, Microservices, Junit, Mockito

Experience

Vajra IoT Pvt Ltd | Hyderabad

November 2024 – Present

Jr. Software Engineer

- Architected and deployed a cloud-native **IoT Monitoring System** on **AWS**, managing 1,000+ connected devices and 1000+ battery banks in production.
- Built a scalable **Spring Boot backend** with **RESTful APIs**, processing 5,000+ real-time data points/hour and enabling predictive maintenance (25% downtime reduction).
- Developed an interactive **React.js dashboard** for real-time analytics, historical insights improving response time by 70%.
- Optimized **SQL schema, indexing, and query performance** for large-scale time-series data, increasing reporting speed by 40%.
- Implemented **CI/CD pipelines** using **Docker, Jenkins, and AWS EC2**, automating deployments and reducing release cycles by 60%.

Projects

Book Social Network | Spring Boot, Angular, PostgreSQL, Docker, Spring Security [Demo]

August 2024

- User Registration:** Users can register for a new account.
- Email Validation:** Accounts are activated using secure email validation codes.
- User Authentication:** Existing users can log in to their accounts securely.
- Book Management:** Users can create, update, share, and archive their books.
- Book Borrowing:** Implements necessary checks to determine if a book is borrowable.
- Book Returning:** Users can return borrowed books.
- Book Return Approval:** Functionality to approve book returns.
- API Documentation:** Documented the RESTful API using OpenAPI (Swagger) for clear and comprehensive API documentation.

E-Commerce Backend Microservice | SpringBoot, Kafka, PostgreSQL, MongoDB, Zipkin, Docker [Demo] Oct 2024

- Built a **scalable application** supporting users for registration, product browsing, and real-time inventory checks
- Automated 2+ email notifications per order using **Kafka** for **asynchronous data streaming**.
- Designed **five independent microservices** registered via **Eureka**, enhancing **service reliability and isolation**.
- Centralized **user requests** through an **API Gateway**, improving **access management efficiency**.
- Implemented a **Configuration Service**, reducing **setup time by 30%**, and **Zipkin** for **distributed tracing** across services.

Leadership / Extracurricular

- Awarded certification of appreciation for outstanding efforts in organizing the national level technical symposium E-Blaze 2k24, which saw a 50% increase in participation.
- I led various events in our college and actively participated in departmental activities, including conducting debates, paper and poster presentations, quizzes, and more.
- Led community service projects focused on electrical safety and energy conservation, involving outreach to villages and government schools, impacting over 500 individuals (Duration: 1 month)
